

## Droid OS: WPA2 Configuration

Follow these steps to set up your Android device running Android 2.0.x and above to use WPA2 encrypted wireless at Wesley College.

### Enable/Configure your device's Wi-Fi.

1. Click the **Settings** application.
2. Choose **Wireless & networks**.
3. Select **Wi-Fi settings**.

### Select the encrypted wireless service.

4. Make sure Wi-Fi is turned on.
5. Click on the **Wesley-FS** network (see information below if this network does not appear)\*
6. If presented with a Credentials Manager password prompt, enter your Droid Credentials Manager password. (**This is not your Wesley password**. If you do not know the Credentials Manager password, clear it by going to **Settings > Location and Security > Clear storage**, then repeat steps 2-4.)

### Configure Wesley\_FS options.

7. EAP Method: Select PEAP
8. Phase 2 Authentication: Select MSCHAPV2.
9. For both CA certification and Client certificate, leave as N/A. (if applicable)

### Continue Configuring Wesley\_FS option.

10. Enter your Wesley username in the **Identity** field.
11. Leave the **Anonymous Identity** field blank.
12. Enter your Wesley password in the **Wireless password** field.
13. Click **Connect**

### Verify your connection.

\* Under Wi-Fi, you should see Connected to Wesley\_FS.
