

**To connect your Windows 8 device to the
"Wesley_FS" secure wireless network**

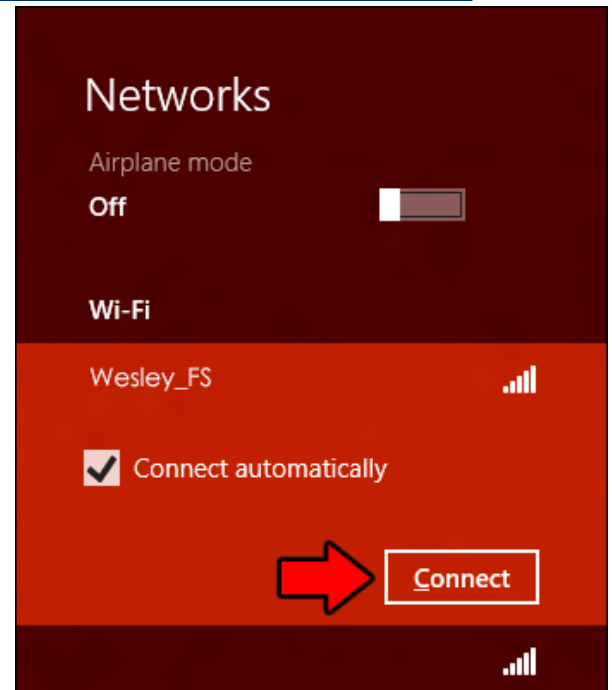

1. From the desktop, click on the wireless icon on the taskbar.

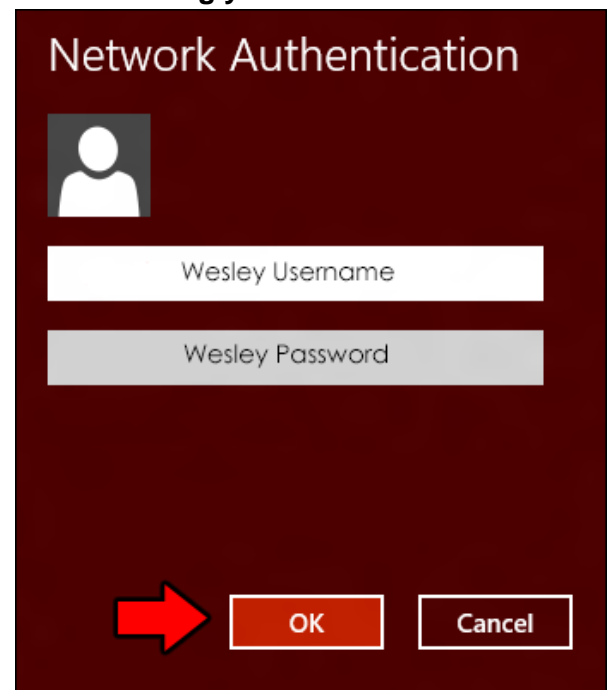

2. Click on Wesley_FS on the networks list.

3. Make sure "connect automatically" is checked, then click connect.

4. Enter your Wesley username and password, then click OK.
****Important: You may be required to enter your information twice (2x) before authenticating you.**

5. If shown a message regarding certificates, click connect.
