

To connect your Windows 8 device to the "Wesley_Student" secure wireless network

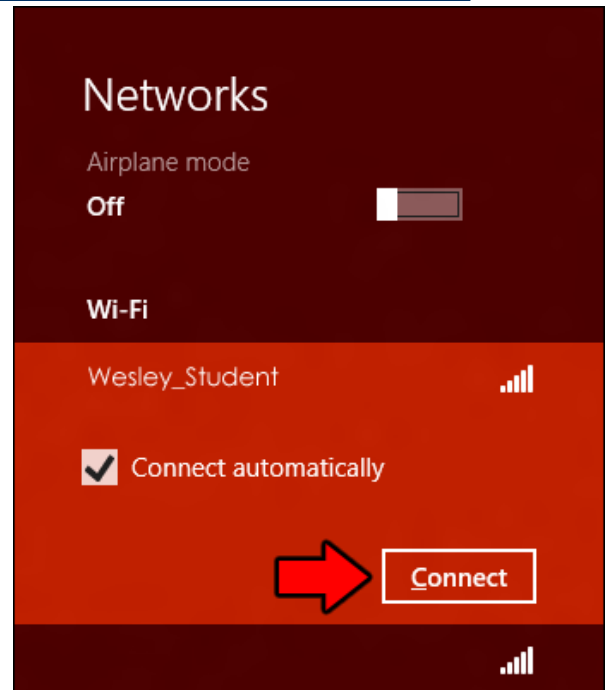

1. From the desktop, click on the wireless icon on the taskbar.

2. Click on Wesley_Student on the networks list.

3. Make sure "connect automatically" is checked, then click connect.

4. Enter your Wesley username and password, then click OK.
***Note:** Your Wesley username should be entered in the format of firstname.lastname and the password is your first initial + last initial + JICS ID Number. (ie; js123456)
****Important: You may be required to enter your information twice (2x) before authenticating you.**

Network Authentication

FirstName.LastName

FI-LI-JICS ID

5. If shown a message regarding certificates, click connect.

Wesley_Student 

Windows can't verify the server's identity

If you're in an area where you'd expect to find this network, it's probably safe to connect. Otherwise, this might be a different network with the same name.
